

HANGAR

BACK TO LIFE

## Introduction

A FEW WORDS ABOUT HANGAR 54

Two brothers, one vision: To design and manufacture beautiful bespoke aviation artwork and furniture, fuelled by a shared passion for design, elegance and perfection.

Hangar 54 is a family run and family owned company located in the Garden of England. Specialising in the design and creation of aviation artwork and furniture for the home, office or individually branded for corporate and social event hire. Saved and reborn from aeroplane and aeronautical salvage, these unique and stunning pieces of aviation furniture and artwork are carefully crafted to show respect to their former life, and admiration for sublime aviation engineering. We believe in saving the condemned, aircraft that time has long since forgotten. Recapturing their bygone glory to take flight once more.

The result is a bespoke, high end product. A piece of Hangar 54 aviation furniture will captivate. Distinctive designs, sparking conversation or providing the 'wow' factor. Every item from our range, be it a conference table or reception desk, a part of aviation history, brought back to life. Furniture that is not only functional and stylish but designed and finished by skilled craftsmen to the highest possible standards.

It's recycling, but not as you know it. Sourced globally, aircraft parts from yesteryear are rescued from the scrap heap and then uniquely designed with love, passion and artistic flair, culminating in British-made aviation artwork and furniture to be proud of.

Our product range is exclusive. Aviation salvage and sourced materials are limited and hard to find. Each reclamation is unique, bespoke and custom-finished, truly a one of a kind.

The sky's the limit!

Our product range is available for private clients for their homes, corporate clients, for office and retail uses. Also product leasing for a cost effective opportunity to individually brand peices that can be hired for corporate or social events. We also welcome bespoke request and concept designs.

Hangar 54 now proudly boasts an extensive portfolio of custom crafted furniture that artistically embraces aviation engineering. Each component brought back to life through inspired and considerate design and fabrication. The product range includes desks, conference tables, seating and display cabinets, along with sculptures and art pieces forged from salvaged aircraft parts.

# 02

Our extensive product range creates the perfect wow factor in any environment. Every corporate business looks to gain advantage when promoting and exhibiting their products, brands and services. Using the finest materials, we are able to custom fabricate individual or multiple pieces with your logo or branding to help achieve the maximum affect. This has been a big part of our business which has seen massive growth in popularity.

● Offering a unique high-end collection of vintage aviation related furniture

● We are pulling the golden age of flight from the history books and into your very own home

● Taking aircraft salvage bringing them **back to life** in new and innovative ways.

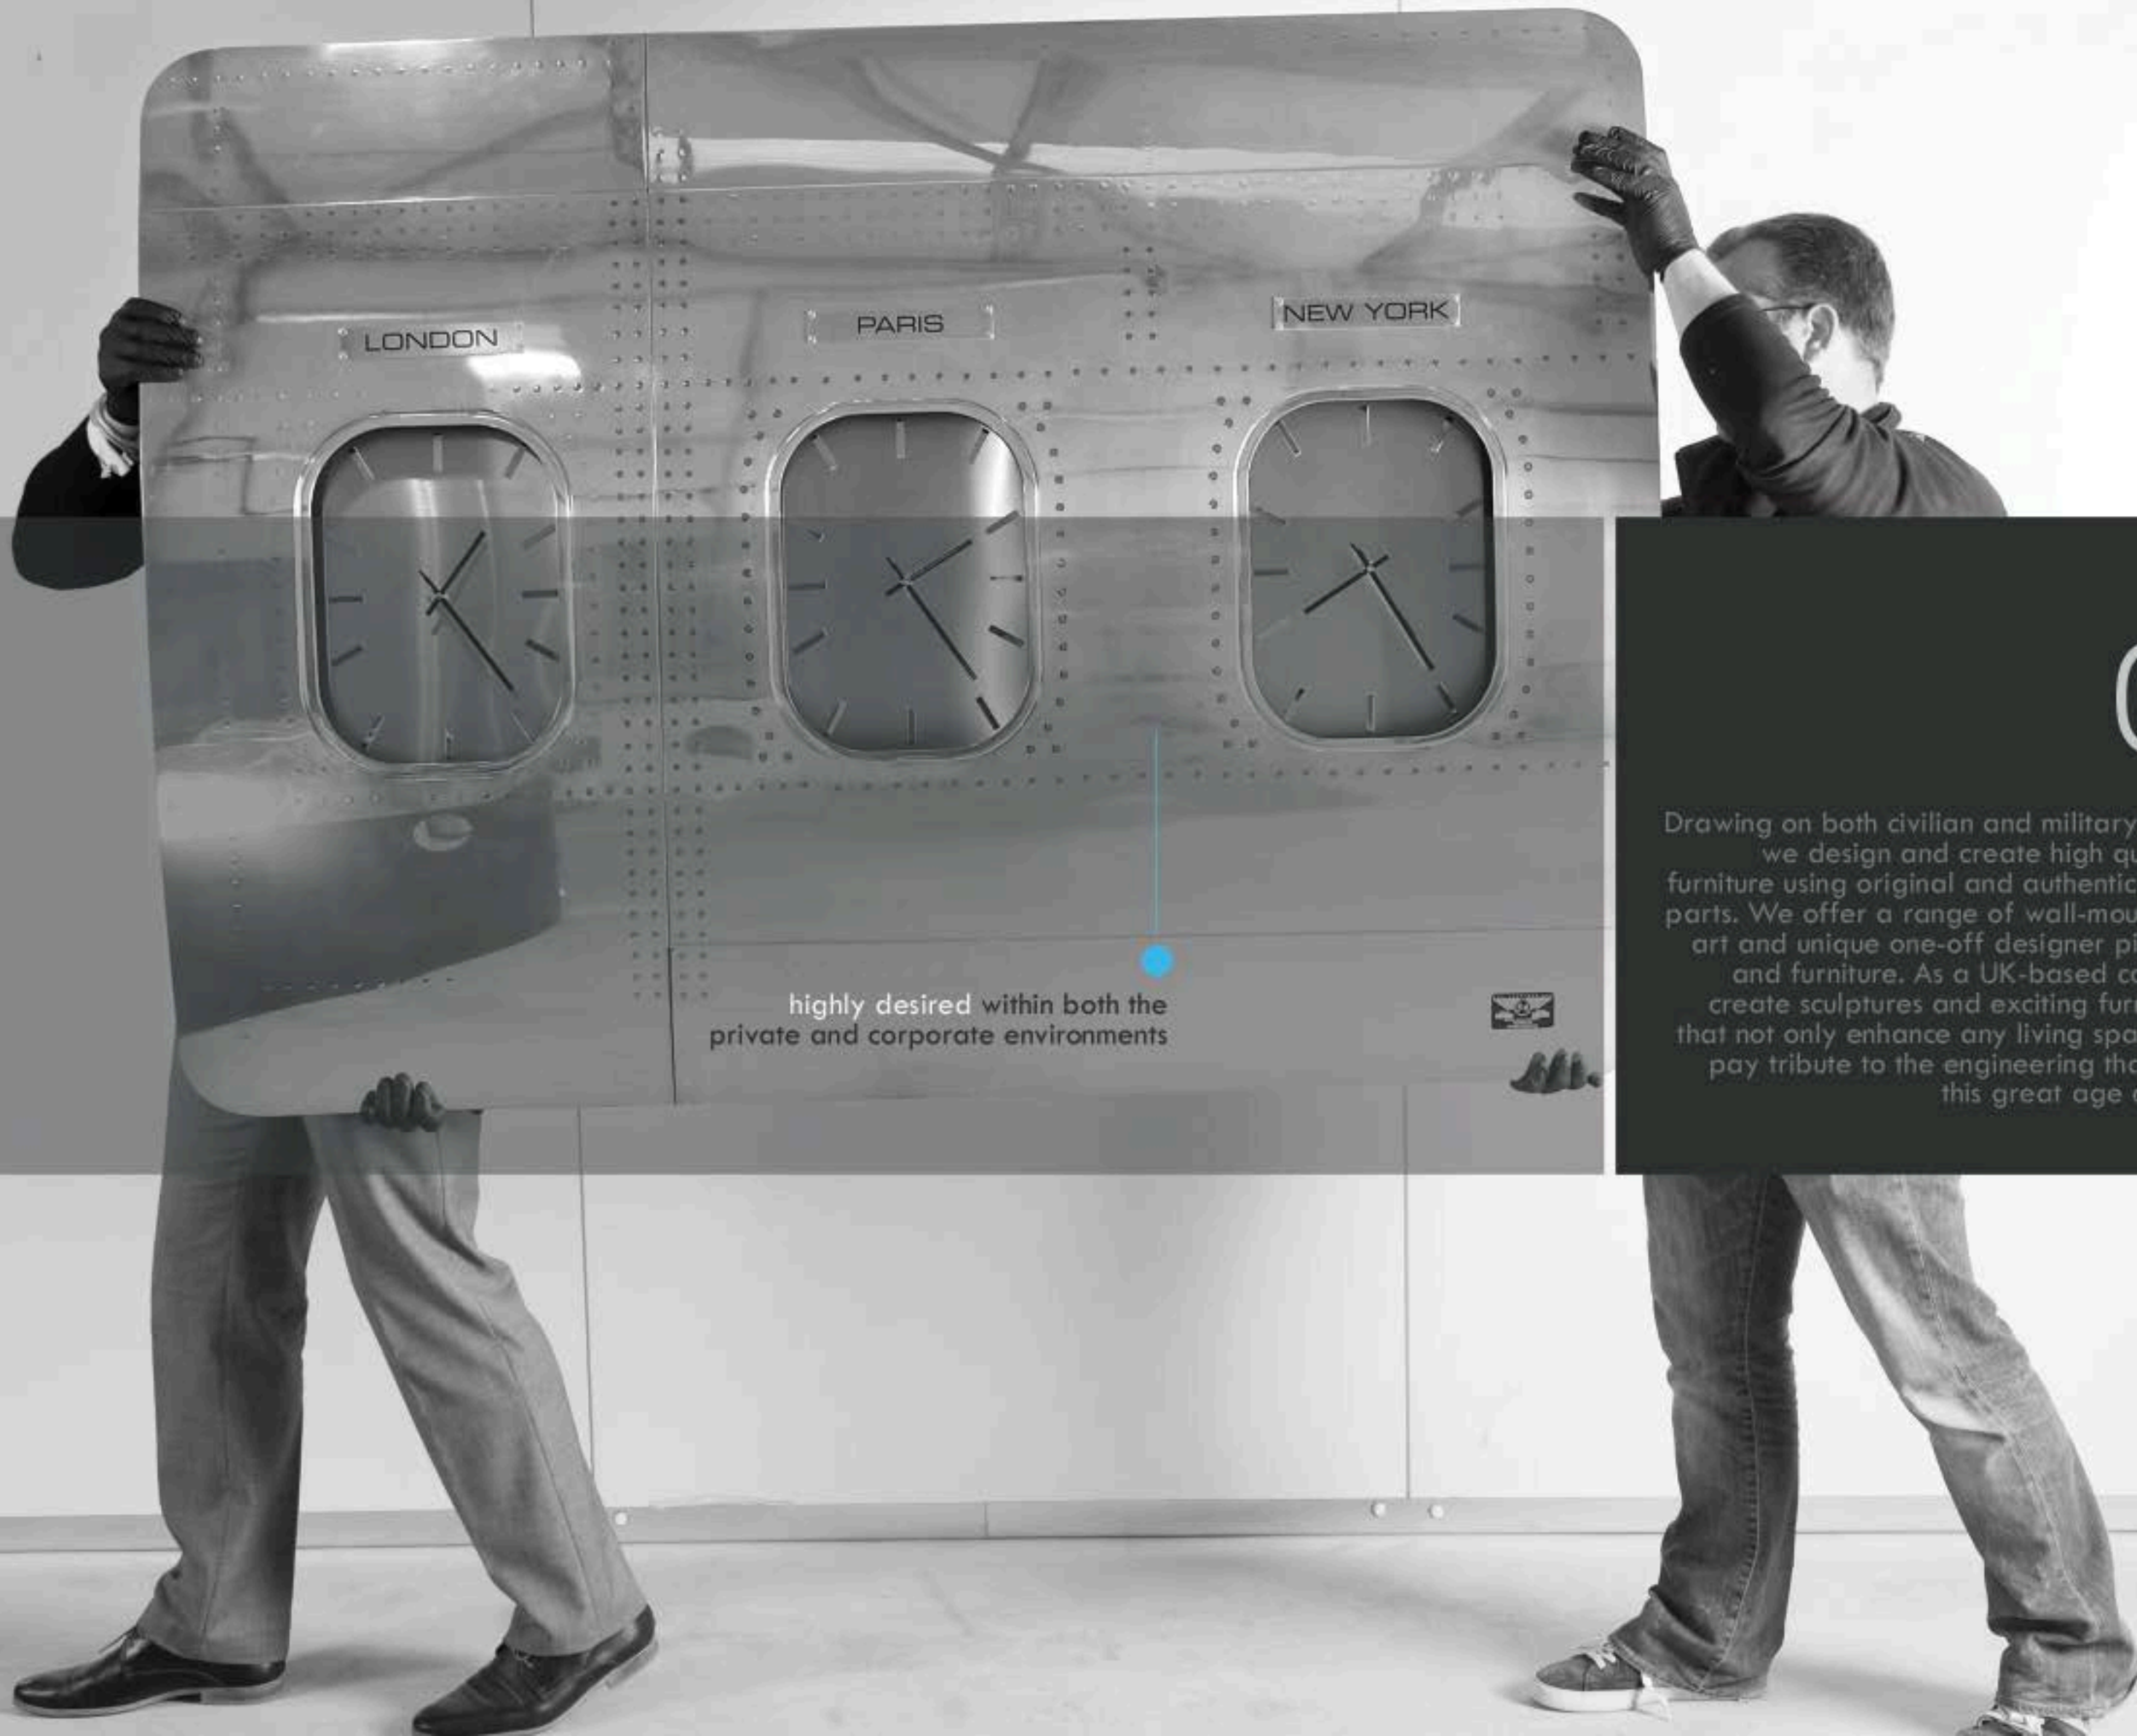

# 03

We offer a start-to-finish bespoke service: we work with your designs or your ideas, creating aviation furniture that is unique. You may have a vision for a finished piece; or have an aircraft part in mind that you specifically want re-purposed?

We will entice your ideas off the paper and meticulously forge them into bespoke pieces of aviation artwork. Imagine being involved every step of the way, the creative process culminating in a successful interpretation of your very own

Two brothers, one vision: To design & manufacture beautiful bespoke aviation artwork & furniture, fuelled by a shared passion for design, elegance & perfection.

highly desired within both the private and corporate environments

# 04

Drawing on both civilian and military inspiration we design and create high quality home furniture using original and authentic aeroplane parts. We offer a range of wall-mounted plane art and unique one-off designer pieces of art and furniture. As a UK-based company we create sculptures and exciting furniture items that not only enhance any living space but also pay tribute to the engineering that goes into this great age of aviation.
